Garry,

Our team will most likely include

Paul Bucholtz
Joe Rathbun
Drew Santini
John Kern

I polled the group. Our best dates looking at the weeks of 3/11 and 3/18 are 3/14, 18, and 19. I start to lose people if we go to other days within that block of time.

Gary,

Per the AOC you'll need to send an extension letter. Part of that letter may have an interim schedule, however, I expect the extension request to have a date upon which you will submit the revised FS report. I do not believe it would be appropriate to set a submittal date based upon the results or agreements reached in future meetings. EPA has no problem meeting with GP to discuss the issues you mentioned below. However, we expect GP to be working on resolution of our comments submitted on 2/5/13.

The following individuals on behalf of EPA will most likely be involved with the 3 issues you have discussed below:

Jim Saric
Jeff Keiser
Patty White
Frank Dillon
John Canar
Chuck Roth

Regarding everyone's availability, it's difficult to provide you specific dates and times. However, we will be available to discuss the topics. Please provide EPA a list of preferred dates and times and we will coordinate. Also, we will want to make sure that MDEQ is involved in these discussions as well.

Thanks

Jim

Subject: Kalamazoo Area 1 FS

Jim,

In follow up to our February 20th meeting, in early March Georgia-Pacific will be providing EPA with a schedule for completion of a number tasks required to address the comments contained in EPA's disapproval letter dated February 5, 2013, and preparation of an approvable Area 1 FS. The schedule will provide justification for extending the current 45 day response period. Three of the key tasks are to develop methods to: 1) calculate sediment SWAC values, 2) trend historical fish tissue PCB concentrations/project future fish concentrations for each of the remedial alternatives, and 3) estimate the PCB contribution to the river from river banks and floodplains. Since this effort will need to be completed in a collaborative manner, please provide the names and availability beginning the week of March 11th, of those persons that will be participating in this process. (Paul, the same is asked of MDEQ) Since we may need several calls and possibly a meeting to resolve each of these issues, I would like to get started scheduling while GP completes selection of our new consultant.

I look forward to your timely response.

Garry Griffith, P.E.
